

**Enzo Daren B. Padual**
**Digital Engineering : Programmer Analyst Trainee**

## PERSONAL INFORMATION

| | |
|---|---|
| **Name** | Enzo Daren B. Padual |
| **Contact number** | 09763893234 |
| **Email** | EnzoDaren.Padual@cognizant.com |
| **Current Role** | Programmer Analyst Trainee |
| **Website Portfolio** | Portfolio |

## SUMMARY

Enzo Daren Padual is a motivated Programmer Analyst Trainee with hands-on experience in full-stack and front-end development through Cognizant GenC training and client project work with CliftonLarsonAllen (CLA). He has worked on enterprise web applications using React, TypeScript, JavaScript, Node.js, REST APIs, SQL Server, Git, Azure DevOps, and related development tools, contributing to feature enhancements, defect resolution, database validation, and Agile delivery activities. He also continues to strengthen his technical foundation through certifications in React, TypeScript, Redux, microservices architecture, prompt engineering, AI agents, machine learning, NLP, and Azure OpenAI, demonstrating adaptability, continuous learning, and a strong commitment to building scalable, maintainable software solutions.

## SKILLS SUMMARY

| | |
|---|---|
| **Front-end Skills** | React, HTML, CSS, Bootstrap, React Native, MUI |
| **Back-end Skills** | TypeScript, Node.js, C#, Fastify, Knex.js |
| **Database** | MSSQL, Firestore, MongoDB |
| **Other Skills** | Proficient in Linux system administration, Ansible, Bash Scripting, Understanding in Network Architecture and Router/Switch security. |

## Skill Matrix

| Languages/Frameworks/Libraries, Databases, Dev tools, Business Domain Knowledge, Management Skills | Expert Level (1-5) 1 = New, 5 = Expert | Year Exp | Last used (Year) |
|---|---|---|---|
| React | 4 | 2 years | 2026 |
| NodeJS | 4 | 1 year | 2026 |
| Typescript | 3 | 0.1 year | 2026 |
| C# (.NET) | 3 | 0.7 year | 2026 |
| MUI | 3 | 0.4 year | 2026 |
| MSSQL | 4 | 1 year | 2026 |
| PostgreSQL | 2 | 0.2 year | 2026 |
| Ansible | 3 | 2 years | 2024 |
| Bash Scripting | 3 | 2 years | 2024 |
| React Native | 3 | 1 year | 2025 |
| Visual Studio | 2 | 1 year | 2025 |
| Visual Studio Code | 4 | 4 years | 2026 |

| | | | |
|---|---|---|---|
| Postman | 4 | 0.2 year | 2022 |
| Git version control | 4 | 3 years | 2026 |
| Github Copilot | 4 | 1 year | 2026 |
| Linux System Administration | 4 | 3 years | 2024 |
| Cisco Routing and Switches | 4 | 3 years | 2025 |
| Microsoft Azure | 3 | 0.3 year | 2026 |
| Docker | 2 | 1 year | 2026 |
| Python | 2 | 2 years | 2025 |
| REST API | 3 | 0.4 year | 2026 |
| Unit Testing | 3 | 0.4 year | 2026 |
| Regression Testing | 4 | 0.4 year | 2026 |
| Integration Testing | 2 | 0.4 year | 2026 |
| Swagger/OpenAPI | 3 | 0.4 year | 2026 |
| PowerApps | 3 | 0.3 year | 2026 |
| Power Automate | 3 | 0.3 year | 2026 |

# PROFESSIONAL EXPERIENCE

## Summary

**Cognizant GenC (2026-Present) Programmer Analyst Trainee**

- Developed responsive user interfaces using **HTML, CSS, Bootstrap, and JavaScript** as part of Cognizant's StackRoute Full-Stack Bootcamp.
- Built and optimized front-end components to improve usability, accessibility, and overall user experience.
- Implemented interactive features and UI behaviors using JavaScript to support dynamic web functionality.
- Completing different hands-on exercises and project-based assignments that simulate real-world application development.
- Practiced debugging, code refinement, and front-end problem-solving throughout the training program.
- Collaborated in mentor-led sessions, group activities, and discussions to reinforce learning and improve technical proficiency.
- Leading the design, development, testing, and continuous enhancement of the PH Studio Parking Reservation System using Microsoft Power Apps, SharePoint Lists, and Power Automate. Leveraging Microsoft 365 Copilot and Claude AI to accelerate application development, workflow design, problem-solving, and feature implementation. Currently developing and refining key functionalities, including parking reservation and approval workflows, parking slot availability management, automated notifications, data validation, responsive user interface design, and business process automation. Conducting ongoing testing, troubleshooting, and iterative improvements to optimize system functionality, performance, and user experience.
- Actively participated in comprehensive C# training, completing a series of hands-on exercises covering core programming concepts such as collections (Lists and Dictionaries), Data Transfer Objects (DTOs), loops, string manipulation, expressions, recursion, and problem-solving techniques. Developed practical experience in API development and testing using Swagger, including designing and updating API endpoints, retrieving and filtering data, and implementing role-based access control for Admin and Viewer user roles.

- **Technology:** HTML, JavaScript, CSS, Postman, React, C#, Swagger, Express, Node, Git, PowerApps, Power Automate, Microsoft SharePoint and Lists.

April 2026 – July 2026

**Client: CliftonLarsonAllen (CLA)**

- Develop and maintain enterprise web applications using React, JavaScript/TypeScript, and related front-end technologies.
- Implement new features and enhancements for form management solutions, improving functionality, usability, and user experience.
- Investigate, troubleshoot, and resolve application defects by analyzing code, debugging issues, and implementing sustainable fixes.
- Work closely with QA engineers, business stakeholders, and development teams to validate requirements, verify fixes, and ensure product quality.
- Contribute to the design and maintenance of reusable components, application logic, and front-end architecture following established development standards.
- Execute database investigations and data validation using SQL to support debugging, issue resolution, and feature development.
- Participate in code reviews, pull request activities, and Agile development processes to maintain code quality and team collaboration.
- Analyze complex business requirements and translate them into scalable, maintainable software solutions.
- Support continuous improvement initiatives through code optimization, refactoring, and performance enhancements.
- Utilize Git-based version control workflows for source code management, collaboration, and deployment processes.
- **Tech Stack:** React, TypeScript, JavaScript, HTML5, CSS3, Bootstrap, REST APIs, SQL Server (T-SQL), Git, GitHub, Azure DevOps, VS Code, Postman, Agile Scrum.

**Twireless Inc. (2025) Hardware and Technical Support Intern**

- Diagnosed and resolved hardware and software issues for laptops, desktops, and tablets, reducing user downtime.
- Performed routine maintenance tasks, including system clean-ups, OS installation, and component inspections, which improved system performance.
- Assisted with quality checks and inventory management, ensuring accurate tracking of equipment and contributing to a reduction in inventory discrepancies.
- Provided technical support to various departments, contributing to overall operational efficiency and team productivity.
- **Technology:** AnyDesk, MS Office, WAN/LAN concepts, Router and Switch Management, IP addressing, Network Troubleshooting

## TRAINING AND CERTIFICATIONS

Completed trainings and certifications supporting front-end development, AI-assisted engineering, microservices architecture, and professional workplace effectiveness.

### Training, Certifications, and Professional Development

#### 1. Workplace and Professional Skills

- **Understanding Personality Types at Work (Jan 15, 2026)** - Improved awareness of workplace personality styles to support better collaboration and communication.
- **How to Build Your Professional Network (Jan 16, 2026)** - Covered practical approaches for building professional relationships and expanding career connections.
- **Accountability Training for Managers and Corporate Employees (Jan 19, 2026)** - Focused on ownership, responsibility, and follow-through in a professional work environment.

#### 2. Frontend Development and State Management

- **React 18 / 19 Course 2025 - Learn React JS the Fast Way (Mar 3, 2026)** - Strengthened React fundamentals, including components, state, events, routing, and modern frontend workflows.
- **React & TypeScript - The Practical Guide (Mar 9, 2026)** - Built practical skills in combining React with TypeScript to create type-safe and maintainable user interfaces.
- **The Ultimate Redux Course 2026 - Latest Redux Toolkit (Mar 12, 2026)** - Covered Redux Toolkit concepts for application state management, debugging, middleware, and React integration.

#### 3. Software Architecture and Distributed Systems

- **The Complete Microservices & Event-Driven Architecture (Mar 13, 2026)** - Covered microservices design, event-driven communication, service boundaries, and scalable architecture patterns.
- **Microservices: Designing Highly Scalable Systems (Mar 16, 2026)** - Focused on designing distributed systems that can scale reliably across services and infrastructure.
- **Microservices Architecture - The Complete Guide (Mar 18, 2026)** - Explored microservices principles, including deployment, monitoring, data management, and architecture trade-offs.

#### 4. Programming and Software Development

##### Python Development

- **Python for Developers (Aug 4, 2026)** - Developed foundational Python programming skills for building, organizing, and maintaining software applications.

##### C# Foundations

- **C# Setting Up Development Environment (Sep 25, 2026)** - Covered the preparation and configuration of a development environment for creating and running C# applications.
- **C# Fundamentals (Sep 25, 2026)** - Introduced fundamental C# concepts, syntax, and software-development practices.
- **C# Output Lab: Console Creatures (Sep 25, 2026)** - Applied C# output and console-programming concepts through a hands-on coding exercise.
- **C# Data Types and Variables (Sep 25, 2026)** - Covered C# variables, built-in data types, value storage, and fundamental data-handling concepts.
- **C# Data Types Lab: Galactic Travel Agency (Sep 25, 2026)** - Applied C# data-type and variable concepts through a practical programming activity.
- **C# Numbers (Sep 25, 2026)** - Developed familiarity with numeric data types, arithmetic operations, and number manipulation in C#.
- **C# Numbers Lab: Money Maker Live (Sep 30, 2026)** - Applied C# numeric operations and calculations through a hands-on programming exercise.
- **C# Strings (Sep 30, 2026)** - Covered string creation, manipulation, formatting, and text-processing fundamentals in C#.
- **C# Strings Lab: Mad Libs (Sep 30, 2026)** - Practiced C# string manipulation and user-input handling through an interactive coding activity.
- **C# Logic (Oct 1, 2026)** - Covered Boolean expressions, logical operators, and decision-making foundations in C#.

- C# Logic Lab: Space Expedition Boolean Adventure (Oct 1, 2026) - Applied Boolean logic and conditional reasoning through a practical C# exercise.
- C# Conditionals (Oct 1, 2026) - Developed skills in controlling program flow through conditional statements and branching logic.
- C# Conditionals Lab: Choose Your Own Adventure (Oct 2, 2026) - Applied conditional logic by building an interactive branching program in C#.
- C# Conditionals Lab: Password Checker (Oct 2, 2026) - Practiced validation and conditional decision-making by implementing a password-checking exercise.
- C# Arrays (Oct 2, 2026) - Covered the creation, access, iteration, and manipulation of array-based collections in C#.
- C# Arrays Lab: Space Mission Inventory (Oct 2, 2026) - Applied C# array concepts through a hands-on inventory-management exercise.
- C# Loops (Oct 2, 2026) - Covered iterative-programming concepts using loops to automate repeated operations in C#.

5. Artificial Intelligence and Machine Learning Foundations
- Machine Learning for Absolute Beginners - Level 1 (May 6, 2026) - Introduced basic machine-learning concepts, terminology, and beginner-friendly model understanding.
- Executive Briefing: Deep Learning (DL) (May 7, 2026) - Provided a high-level overview of deep-learning concepts, business applications, and AI impact areas.
- Executive Briefing: Natural Language Processing (NLP) (May 7, 2026) - Explained NLP concepts and how language-based AI can support automation, search, and text understanding.
- AWS Cloud Practitioner 2025: ML, AI, & Data Analytics (Aug 12, 2026) - Provided an overview of AWS machine-learning, artificial-intelligence, and data-analytics services.
- Generative AI, Prompting, and Ethics Awareness - Beginner (Sep 24, 2026) - Introduced generative AI, prompting fundamentals, and responsible AI usage considerations.

6. Prompt Engineering and Context Engineering
- Prompt Engineering Foundation (Apr 14, 2026) - Introduced structured prompt-design techniques for producing clearer and more reliable AI-assisted outputs.
- Prompt Engineering - .NET (Jun 20, 2026) - Focused on applying prompt-engineering concepts in .NET development and AI-assisted solution scenarios.
- Context Engineering 101 (Completion date not shown) - Introduced context-engineering concepts for organizing relevant information and supporting more reliable AI-assisted outputs.

7. AI Agents and Workflow Automation
- Intro to AI Agents: Build an Army of Digital Workers with AI (Apr 15, 2026) - Provided an overview of AI-agent concepts, workflows, and automation opportunities using digital workers.
- AI Agents: Building Teams of LLM Agents that Work for You (Apr 22, 2026) - Covered multi-agent collaboration patterns, task delegation, and practical use cases for LLM-based agents.
- AI Agents - 101 Basics (Apr 23, 2026) - Covered foundational agentic-AI concepts, common use cases, and introductory governance considerations.
- AI Agents and Workflows (Aug 4, 2026) - Introduced AI-agent concepts and the workflows used to coordinate agent-supported tasks.

8. Claude AI and Claude Code
- Claude AI: The AI Assistant You'll Actually Use (Apr 30, 2026) - Introduced Claude AI capabilities and practical productivity uses for everyday work activities.
- Claude, Claude Code, Claude Cowork, and Claude in MS Office (May 4, 2026) - Explored Claude-based coding, collaboration, coworking, and Microsoft Office productivity scenarios.
- Claude Awareness Program (May 5, 2026) - Covered responsible and practical usage of Claude AI tools in workplace productivity and development contexts.
- AI-Assisted Developer: Claude Code Knowledge Based Assessment [201-Intermediate] (Sep 2, 2026) - Validated intermediate knowledge of Claude Code within AI-assisted software-development workflows.

9. OpenAI, Azure OpenAI, and Codex

- Azure OpenAI Services - The Complete Guide (May 26, 2026) - Covered Azure OpenAI concepts, service capabilities, prompt usage, and enterprise AI application patterns.
- OpenAI Technical Practitioner [201-Intermediate] (Sep 18, 2026) - Strengthened intermediate knowledge of OpenAI technologies and their technical applications.
- Codex Deployment Practitioner Program [201-Intermediate] (Sep 22, 2026) - Covered intermediate considerations for deploying and operationalizing Codex-supported development solutions.
- Codex Deployment Practitioner (Sep 22, 2026) - Developed practical awareness of deploying Codex-enabled solutions within software-development workflows.

10. AI-Assisted Software Development

- AI Assisted Developer: GitHub Copilot Knowledge Based Assessment [201-Intermediate] (Sep 4, 2026) - Assessed intermediate knowledge of GitHub Copilot and AI-assisted software-development practices.
- AI-Assisted Developer: GitHub Copilot On the Job Evaluation [201-Intermediate] (Sep 17, 2026) - Evaluated the practical application of GitHub Copilot in workplace software-development activities.
- AI-Assisted Development Using Gemini Assist: Knowledge Based Assessment [201-Intermediate] (Oct 2, 2026) - Assessed intermediate knowledge of Gemini Assist in AI-supported software-development workflows.
- AI Augmented Software Engineer: Gemini Assist Knowledge Based Assessment [201-Intermediate] (Oct 2, 2026) - Validated intermediate understanding of using Gemini Assist to augment software-engineering activities.
- AI Assisted Developer: DA Pre-requisite (Completion date not shown) - Completed the prerequisite learning required for the AI-Assisted Developer learning path.

11. Google Gemini and Enterprise Agent Development

- Build with Gemini Skill Badge (Sep 25, 2026) - Developed practical familiarity with building AI-assisted solutions using Gemini capabilities.
- Google Certified Partner Specialist: Gemini Enterprise Agent Development - Use Agents to Build Agents (Sep 28, 2026) - Explored agent-based approaches for designing and creating additional AI agents.
- Google Certified Partner Specialist: Gemini Enterprise Agent Development - Agent Evaluation and Hill Climbing (Sep 30, 2026) - Covered methods for evaluating AI agents and improving their performance iteratively.
- Google Certified Partner Specialist: Gemini Enterprise Agent Development - Build and Deploy Agents with Agent Development Kit (ADK) (Oct 1, 2026) - Developed knowledge of building and deploying agents using the Agent Development Kit.
- Google Cloud Partner Specialist Certification: Gemini Enterprise Agent Development (Oct 2, 2026) - Validated knowledge related to developing enterprise AI agents using Google Cloud and Gemini technologies.
- Build with Gemini - Track 2: Platform IT Developer Badge (Oct 14, 2026) - Completed the Platform IT Developer track focused on building technical solutions with Gemini.

12. AWS Cloud Foundations and Practitioner Training

Foundational Badge and Cloud Concepts

- AWS Cloud Quest: Cloud Practitioner - Training Badge (Aug 7, 2026) - Completed the AWS Cloud Quest training badge focused on foundational cloud concepts and AWS Cloud Practitioner topics.
- AWS Certified Cloud Practitioner: Cloud Concepts Literacy - Beginner Level (Aug 10, 2026) - Covered foundational cloud-computing concepts and introductory AWS Cloud terminology.
- AWS Cloud Practitioner 2025: Benefits & Design Principles of the AWS Cloud (Aug 10, 2026) - Covered the principal benefits of cloud computing and foundational AWS Cloud design principles.

Cloud Operations, Migration, and Economics

- AWS Cloud Practitioner 2025: Automation & Managed Services (Aug 10, 2026) - Introduced AWS automation capabilities and managed services used to reduce operational overhead.

- AWS Cloud Practitioner 2025: Migration to the AWS Cloud & Cloud Economics (Aug 10, 2026) - Covered cloud-migration considerations and the economic principles associated with adopting AWS.
- AWS Cloud Practitioner 2025: Deploying & Operating in the AWS Cloud (Aug 11, 2026) - Introduced the fundamental considerations involved in deploying and operating workloads in AWS.

Identity, Security, and Compliance

- AWS Cloud Practitioner 2025: Access Management (Aug 10, 2026) - Introduced AWS access-management concepts for controlling permissions and access to cloud resources.
- AWS Cloud Practitioner 2025: Shared Responsibility & Compliance (Aug 11, 2026) - Covered the AWS shared-responsibility model and fundamental cloud-compliance considerations.
- AWS Cloud Practitioner 2025: Components & Resources for Security (Aug 11, 2026) - Introduced AWS security components, resources, and foundational cloud-protection concepts.
- AWS Cloud Practitioner 2025: Overview of Cloud Security (Aug 11, 2026) - Introduced core cloud-security principles and AWS security considerations.
- AWS Certified Cloud Practitioner: Security and Compliance Literacy - Beginner Level (Aug 14, 2026) - Covered foundational AWS security, compliance, access-control, and shared-responsibility concepts.

AWS Core Technology and Services

- AWS Cloud Practitioner 2025: AWS Database Services (Aug 11, 2026) - Provided an overview of AWS database services and their roles in cloud-based applications.
- AWS Cloud Practitioner 2025: AWS Compute Services (Aug 11, 2026) - Covered foundational AWS compute services and their use in running applications and workloads.
- AWS Cloud Practitioner 2025: AWS Storage Services (Aug 12, 2026) - Covered AWS storage-service categories and their use in storing and managing cloud data.
- AWS Cloud Practitioner 2025: AWS Network Services (Aug 12, 2026) - Introduced AWS networking services and foundational cloud-connectivity concepts.
- AWS Cloud Practitioner 2025: AWS Developer Services & Tools (Aug 13, 2026) - Covered AWS development services and tools that support application development and delivery.
- AWS Certified Cloud Practitioner: Cloud Technology and Services Literacy - Beginner Level (Aug 13, 2026) - Introduced core AWS technologies, service categories, and common cloud-service use cases.

Billing, Pricing, and Support

- AWS Cloud Practitioner 2025: Technical and Support Resources (Aug 13, 2026) - Introduced AWS technical resources and available support options for cloud users.
- AWS Certified Cloud Practitioner: Billing, Pricing, and Support Literacy - Beginner Level (Aug 13, 2026) - Covered foundational AWS billing, pricing, account-support, and cost-awareness concepts.
- AWS Cloud Practitioner 2025: Pricing, Billing, Budgeting, & Cost Management (Aug 13, 2026) - Developed awareness of AWS pricing, billing, budgeting, and cloud cost-management practices.

Certification Preparation and Applied Learning

- CLF-C02: AWS Certified Cloud Practitioner - Practice Test (Aug 14, 2026) - Reinforced AWS Cloud Practitioner knowledge through assessment questions aligned with the CLF-C02 examination.
- AWS Cloud Practitioner - CLF-C02 (Sep 4, 2026) - Completed a comprehensive learning path covering the principal knowledge areas of the AWS Certified Cloud Practitioner examination.
- AWS Cloud Practitioner Bootcamp August 2025: Session 1 Replay (Sep 7, 2026) - Reviewed the introductory session of an AWS Cloud Practitioner bootcamp.
- AWS Certified Cloud Practitioner (CLF-C02) - Skill Labs (Sep 8, 2026) - Applied AWS Cloud Practitioner concepts through practical skill-based laboratory activities.
- AWS Cloud Practitioner Bootcamp August 2025: Session 2 Replay (Sep 10, 2026) - Continued the AWS Cloud Practitioner bootcamp through its second recorded training session.

13. GitHub, Version Control, and Development Collaboration

- GitHub Foundations Part 1 of 2 (Sep 28, 2026) - Covered foundational GitHub concepts related to repositories, version control, and development collaboration.
- GitHub Foundations Part 2 of 2 (Sep 29, 2026) - Continued the GitHub Foundations learning path with additional repository-management and collaboration concepts.

- GitHub Fundamentals: Administration Basics and Product Features, Part 1 of 2 (Sep 29, 2026) - Introduced GitHub administration fundamentals and key platform features for managing collaborative development environments.
- GitHub Foundations Certification Program (Oct 6, 2026) - Completed the GitHub Foundations certification program covering core GitHub concepts and collaborative development practices.
